CAREER OBJECTIVE

I am a Front-end developer based in Nagpur, India. I have been in the software industry for almost 3.5 years. At present, I am holding the position of React developer with Devlogic Solutions, Pune. I have extensively worked on coding and user interfaces, which includes rich enterprise web applications using reactjs, javascript, jQuery, HTML5, CSS3.

EXPERIENCE

SOFTWARE ENGINEER, Pune, Maharashtra

Devlogic Solutions, August 2020–Present

- Starting with in depth discussion with product owners to understand the business requirement in analysis phase.
- Designing and implementing reusable components with functionalities.
- Writing efficient code by eschewing unwanted re-renders of a function by using advanced Hooks in the application.
- Solving problems pertinent to time and space complexity of existing web applications.
- Created data-grid in the application without using any libraries as it was require many modifications. Hence, introduced a custom data-grid, which allows user to perform major operations like sorting, searching, pagination, exporting csv, editing the values in rows and columns and able to perform nested table over the row.
- Introduced story book in the project for the components to depict the usage of them in the application. Thus, by providing knowledge transfer to a new developer.
- Upgrading the react application to newer version, and migrating it to latest version of material-UI.
- Writing custom hooks to perform life-cycle methods in some component that requires alteration over existing react life-cycle behavior.
- Making corrections in the code as per the review of senior developers and team leader.
- Fixing bugs and production issues raised by the QA.
- Continuous Learning and Keeping Up with Industry Trends: The frontend development field is constantly evolving, with new frameworks, tools, and techniques emerging regularly. As a frontend developer, you should stay up to date with the latest trends and continuously expand your skill set.
- Working closely with the backend development team, designers, and project managers to ensure seamless integration and timely delivery of projects. Effectively communicating ideas, progress, and challenges with the team.
- Code Versioning and Collaboration: Using version control systems like Git, you will collaborate with team members and contribute to shared code repositories. This allows for effective code management, versioning, and seamless collaboration.
- Documentation: Writing clear and comprehensive documentation for your code is important for the maintainability and scalability of the project. Proper documentation enables other developers to understand and work with your codebase efficiently.

SOFTWARE ENGINEER, Bangalore

iOsSys Software, February 2020–January to May 2020

- Building user-friendly and responsive web applications using HTML, CSS, and JavaScript. Implementing designs and layouts provided by UI/UX designers and ensuring the website is visually appealing and functional across different devices and browsers.
- Working closely with UI/UX designers to translate design concepts into functional and visually appealing frontend elements, ensuring consistency and coherence in the user interface.
- Working with React to develop complex and interactive user interfaces. Building reusable components and optimizing the performance of the application.
- Writing clean and efficient JavaScript code to enhance user experience and implement various functionalities on the frontend. Handling asynchronous operations, working with APIs, and integrating third-party libraries or plugins.
- Ensuring that websites and web applications are compatible with various browsers and devices, and testing for responsiveness and functionality across different platforms.
- Writing clean, efficient, and reusable code while adhering to best practices and industry standards. Optimizing the frontend code for improved performance and scalability.
- Applying critical thinking and problem-solving skills to overcome technical challenges and find innovative solutions. Being proactive in identifying potential issues and suggesting improvements to enhance the user experience.

EDUCATION

Bachelor of Engineering (B.E.) in Computer Technology

Priyadarshini College of Engineering, Nagpur

Rashtrasant Tukadoji Maharaj Nagpur University (RTMNU)

Year of Passing: 2019

Percentage: 63.58%

Diploma in [Computer Science]

JD College of Polytechnic, Nagpur

Maharashtra State Board of Technical Education (MSBTE)

Year of Passing: 2016

Percentage: 64.56%

Secondary School Certificate (SSC)

Nehru High School, Nagpur

Maharashtra State Board of Secondary and Higher Secondary Education (MSBSHE)

Year of Passing: 2012

Percentage: 59.27%

SKILLS

Reactjs

Redux

Javascript
