Work Experience

Aug 2022 - Present

Frontend Web Developer

Devlogic Solutions

Starting with in depth discussion with product owners to understand the business requirement in analysis phase. Designing and implementing reusable components with functionalities. Writing efficient code by eschewing unwanted re-renders of a function by using advanced Hooks in the application. Solving problems pertinent to time and space complexity of existing web applications. Created data-grid in the application without using any libraries as it was require many modifications. Hence, introduced a custom data-grid, which allows user to perform major operations like sorting, searching, pagination, exporting csv, editing the values in rows and columns and able to perform nested table over the row. Introduced story book in the project for the components to depict the usage of them in the application. Thus, by providing knowledge transfer to a new developer. Upgrading the react application to newer version, and migrating it to latest version of material-UI. Writing custom hooks to perform life-cycle methods in some

component that requires alteration over existing react life-cycle behavior.

Making corrections in the code as per the review of senior developers and team leader.

Fixing bugs and production issues raised by the QA.

Projects

9 Months

E commerce

Project was about hardware wholeseller and retailers selling and deliver all product in Australia. In an e-commerce project, I handled UI development with Chakra UI in React.JS, managed codebase via GitHub's CI/CD pipeline with AWS, and used Netlify for staging. Building custom components and integrating new functionality for the FE build process

6 Months

Vendor-Registration Portal

Vendor management is a term that describes the processes organizations use to manage their suppliers, who are also known as vendors. Vendor management includes activities such as selecting vendors, negotiating contracts, controlling costs, reducing vendor-related risks and ensuring service delivery
